1. VIII. 60

Typed lists have been made, ^{from the original readings,} first by AD, then (as the plan I had given him turned out to be clumsy, with ^{individual} footnote numbers instead of the stars ultimately used) — Miss K. typed a fair copy, sometime in June, 1960, both of the concordance and of the ^{explanatory} notes for the starred items. Unfortunately there were still a few re-classification numbers to look up when she did this, so they have had to be corrected in ink.

(3. VIII. 60,
on OVER)

The concordances were checked by ^{Mrs. Heath and her grandson Clifford Threlkell} ~~by~~ ^{AD} thus: the list in Box order was checked into the Books, and then the list in FM order was

checked with the one in Box order.

Miss R's fair copy of the Explanatory Notes, (pp. 11-13) was checked against my original by VG and Mrs. Heath on July 12.

For procedure, and especially for method of making list in Box order, see attached page of 24.V.60.

3. VIII.60

Actually, the 1st check by the Heaths was from the original, unimproved list to the fair copy.

Today, Mrs. Heath and I checked the Box - EM list, which had been produced by cutting up and rearranging the EM - Box list, and having found no number errors, regard the checking as adequate. This Box - EM list was checked to the book (held by VG).

ON TYPED CONCORDANCE OF NATIONAL MUSEUM THASIAN WITH BON

On the first column of numbers on the attached pages, see A.-M. and A. Bon, Timbres Amphoriques de Thasos (1957), p.60, where the "M.E." used in this publication is explained as "Musée Epigraphique, A. Bon," since these numbers were given by the Bons to (otherwise unnumbered) handles, at that time stored in the Epigraphical Museum in Athens. The large collection of stamped handles of many classes has since been removed from the Epigraphical Museum, and put into a neighboring storeroom of the National Museum. The letters "EM" have been incorporated by us in the numbers given to all classes of handles in this collection, and are now taken to mean EONIKON MOYZEION. The Thasian are distinguished from the other classes by the letters AB (Bon initials).

Numbers, then, in the AB column in the attached list are prefixed "M.E." in the publication above cited.

Numbers in the BON column are catalogue numbers of the same publication.

Numbers in parentheses to the right of the BON column, such as (1), (2), etc., refer to explanatory notes at the end of this list, pp.5-7. These are usually concerned with corrected readings or classifications resulting from further study, which have sometimes produced anomalies to be corrected in the revised edition of Bon. In the lists, I have given the new inventory numbers of reclassified handles when these happened to be readily available, as e.g. in notes (10) and (16), otherwise a more general indication, cf. note (19). Records exist by which any of these handles could be found, if desirable to look at it.

Gaps in the BON column which have no footnote number beside them, as for instance opposite EM AB 292, mean that the handle is a Thasian with an illegible stamp, not included in the publication. (Sometimes by error footnotes have been cited for such handles, e.g. for AB 239 and 241.)

AB 326 - 334 had remained among the unclassified handles at the Museum, and were not numbered until January 1960, hence none are listed in Bon. Those identified as belonging to Bon types have Bon numbers in parentheses.

- (9) AB 124 has been listed under Bon 325, and used to illustrate the type. The reading ΑΡΙΣΤΟΚΛΗΣ however derives from identification of AB 124 with Dumont, p.16, fig. 6, whereas it should rather be identified with Dumont, p.16, fig. 5, and used to illustrate Bon 1824 instead of Dumont's drawing. We did not find in the National Museum a handle with a stamp corresponding with Dumont's other drawing (p.16, fig.6), but think that what he drew may have been an example of Bon 258, which a new example found in Pella now permits us to restore certainly with the name ΑΡΙΣΤΟΚΛΗΣ.
- (10) AB 126 is a Knidian handle, now numbered KT 2046 EM 2.
- (11) AB 129 is listed twice, under Bon 1071 and under Bon 2017.
- (12) AB 135 is listed twice, probably corrected under Bon 521, and also as the only example of 2109, to be eliminated.
- (13) AB 145 is a Knidian handle, an example of KT 355. EM 6
- (14) AB 146 is an example of Bon 146, but is not listed there (late decipherment).
- (15) AB 152: no handle so marked was found (check 10.XI.53).
- (16) AB 157 is not Thasian, and has been numbered Mis. E.M. 436 (with the unclassified).
- (17,18) AB 167 is Samian(?), now numbered ΣΑΜ. EM 2; and AB 168 is Knidian, an example of KT 809! ^{and 168 bis are} 168 is EM 4, 168 bis is EM 3
- (19) AB 170 and 170bis are Late Knidian, devices respectively palm leaf and amphora.

(20) AB 174 should be, but is not, listed under Bon 53 (late decipherment)
174bis is Pontic (device a quadriga)

(21) AB 175 is Knidian, an example of KT 1726

((22) Omit this reference: AB 178 is an illegible Thasian.)

(23) AB 180 is listed under Bon 70, but as the only example, and seems not to be Thasian.

Mis. EM 440
AB 184 = Mis. EM 441 (Bon 2144)

(24) AB 185 is listed under KT 2106, as the only example. It is in fact Knidian, an example of KT 1050 (numbered KT 1050 EM 7).

(25) - (39) AB 190 - 204 are not Thasian handles, but as follows:

<i>AB 188 = LK EM 68</i>	190 LK EM 409	197 KEP. EM 1 (Corcyrean)

(39bis) AB 206-207, though published in Bon as indicated, are also not Thasian, but AB 206 is Knidian, KT 1439 ex., while AB 207 is LK EM 529 (Late Knidian).

(40) AB 208: no handle so marked was found.

(41) AB 209 is an unstamped handle with rather Knidian fabric

(42) - (47) AB 210-215 are not Thasian handles, but as follows:

(48) AB 218 is listed twice in Bon, correctly under 1412, and as the only example of 2003, to be eliminated.

((54), (55) Omit these references: AB 270 and 276 are apparently illeg. Thas.)

(55) AB 276 is late Knidian, stamp type of LK EM 201

(55bis) AB 285's photograph illustrates Bon 1933, of which it is the only example. But by a number mistake it is listed as 85 instead of 285.

(56) AB 299 is not Thasian but Late Knidian, of the type of LK EM 201.

(57) AB 305 is listed twice in Bon, under 548 of which it is the only example (photograph appears here) and also as an unillustrated example of 1984, where it is said to be illegible. 548 restores it ΔΕΑΛΚΟΣ]. Perhaps it should be restored ΔΕΙ[ΝΟΤΙΑΣ].

(58) AB 308 is listed twice in Bon, with correct restoration as the only example of 1711, and again as the only example of 1949, which should be eliminated.

(56bis) AB 300 is apparently not Thasian. Its number is now Mis. EM 449.

(L. EM. 1 for Latin & Lygia)

As it seems desirable to label the Koan^(?) right soon, and Miss S. is to go next Thursday morning, I have decided now they are to be numbered. The Rhodian lower Nilsson numbers, the Thasian have a separate series applied by Mr. Bon. (A.B. 1, or some such.) They can all be stored thus in useful order. Miss S. arranged the Koan in alphab. order so far as possible, number them in that order to be achieved, with illeg. at end. I come in at 12:30 on Thursday, check over before numbers applied. Bring ink - pens with me.

That blasted other collection in the F.M., up on the shelves in the carpenter's shop, will have to have a straight series of F.M. numbers, as they can be put back in the same mess. E.M. 1, E.M. 2, etc. ^{up to EM 3, 746 or so} Can't be mixed with other series, none of which begin w. F.M.

Coins at National Museum

There were counted & listed as 79^(X) 2 years ago, and since then have lain in a heap in the court.

For the sale of the ^(Augs) Colt bundles to be published, there have been read, by Miss S. Today she will number them, K.S.E.M. 1st etc.

first arranging, so far as possible alphabetically. They will be put in a box in the same room where the heap was, and where the Thesauri have now been placed by Miss B. or (in our baskets). New types will be typed by Miss K.

(X) Numbers will run to K.S.E.M. 70, the number of them found with stamps. Apart from these, there is one ^{stamped} which is ^{definitely} not of the same type and not exactly double, which has been put with the Latin. And 10 unstamped fragments, most of which are with ^{prob.} coins, or not of the period when stamping was done. 2 seem to be from early? fabrics - have little buttons on top.

Must come here and tend to things some day soon but M. Guionnes absent at Agone.
