Intact amphorae on display in the Istanbul Archaeological Museum: [1]

(All in the first room on the second floor opening off the landing display of Byz. ware.)

Handles: 1. a) ^{ΔΙΟ ΦΑΙΝΤΟΥ} ~~ΦΑΝ~~ Σ ~~ΦΑΝ~~ + b) ΕΠΙ ΝΙΚΟΦΑΓΟ ^{ΡΑ} ΑΡΤΑΜΙΤΙΟΥ Π ^{Is. Mus. no 6674}
a) o. of real, very small. φ. Σ looks like C b) Σ very unsure. Letters after Γ (ΡΑΠ) plausible.

2. a) ΔΙΟΥ + b) ΕΠΙ ΚΑΛΙ ΚΡΑΤΟΥΣ ΠΑΝΑΜΟΥ ^{Is. Mus. no 6667}

3. a) ^{conspicuous} squiggle ANTIMACHΟΥ + b) ΕΠΙ ΕΡΕΣ ΑΡΙΣΤΕΥΟΥΣ ΑΡΤΑΜΙΤΙΟΥ ^{Is. Mus. no 6675 (Is. 5)}

a) squiggle begins sth. like CL & goes most of the width of the stamp

4. a) ΛΥΣΙΩ ^[vols] ^{audible, ph. 4/5} + b) --- ΕΥΣ ^{Is. Mus. no 6673}
^{ΔΑΑ}

(v. diffc., esp. given the light. a) not nec. complete.)

5. a) ΑΓΑΘΟΚΛΗΣ + b) ΕΠΙ ΑΟ ^{ΑΙΝΟΥΤΟ} ^{Is. Mus. no 6672}
^{--- ΡΟΣ}

(more could be securely read with good light) ^{ΔΕΥΟΥ?}

All stamps rectangular

I enclose a copy of the readings of the amphora handles found at Sinope which you sent to Carolyn Koehler. Of the 11 stamps, 6 were certainly made in Sinope itself, and one other may have been; 2 are certainly from Rhodes, and another may be; the last one (with BO in a square stamp) we have not yet identified.

Two of the Sinopean, the ones with the names of the magistrates (astynomes) Pasichares son of Demetrios, and Zenios son of Apollodoros can be dated to after mid 2c BCE, Zenios to after 122. The astynome Xenokles son of Apolla- is one we do not ourselves have on file, though a little more research among the Russian publications on Sinopean stamps may well turn up a date for him too. It is possible that more work may enable us to find parallels (and so readings) also for the 3 Sinopean stamps marked "unread" in the list below.

The two legible Rhodian stamps are both earlier: the magistrate Kleukrates appears in stamps with a head of Helios as a device before 175 BCE, and the magistrate Daemon with a Helios symbol is datable to the earliest period of Rhodian stamping, before the middle of the 3rd c BCE. These magistrates were eponymous priests of Helios, not astynomes as in the Sinopean stamps.

Here is the full list. Some abbreviations used:

hdl = handle
 Sin = Sinopean (i.e., made in Sinope)
 Rh = Rhodian (made in Rhodes)
 fab = fabricant (potter)
 ast = astynome (municipal official in Sinope and other city states around the Black Sea)
 Dim = dimensions. PH = preserved height, WxTh = width by thickness of the handle in mm at the place where the stamp was impressed.
 Par = parallel example(s). Pridik 1917 is the publication of the stamps on tiles and amphora handles in the Hermitage Museum, and an SS inventory number represents a stamp from the excavations of the Athenian Agora.
 Frg = fragment
 Fab = fabric (description of clay)

Surface Finds from near Sinope

=====

All hdl's were sent to CGK by David MacDonald, who received them from a US Air officer, who picked them up in the late 1960s "on the beach, toward the edge of town, where the ruins of wall running down to the sea can be seen eroding out of the bluff that backs the beach." (letter of 30.v.95 from D. McD.) All were read from rubbings taken by Carolyn Koehler and sent to Athens, with emendations and parallels provided from the files by Maria Petropoulakou.

didn't go, trying again 17.1.97 OK!

Dear Karolyu,

At last my notes on few SAH sent to you by David Macdonald last year. They are mostly Sinopear. I have forgotten the existence. John Camp asked me last month to see some amphora handles sent to him by Mr. Charles Ede, a friend of Mr. Catling. They were mostly Sinopear, a Thasian and a Rhodian. and that moment I found your notes about ^{few} Sinopear sent to you. I made readings and added few remarks about dates. Mr. Camp will write a letter to him.

Maria is writing the KT's on the LK handles with Andrews supervising

Warm greetings
and Love
Maria

Professor C.G. Koehler
Department of Ancient Studies
University of Maryland Baltimore County
Catonville, MD 21228

Dear Prof. Koehler,

Please find enclosed a small group of amphora handles collected at Sinope in the late 1960s by an American Air Force officer. He described the find spot as on the beach, toward the edge of town, where the ruins of wall running down to the sea can be seen eroding out of the bluff that backs the beach. I am sorry the description is not more specific, but the amphora handles had been collected casually some years ago. The retired officer was not able to point out the spot on a map.

The retired officer turned the handles over to me after hearing a lecture I gave in which I talked about the despoiling of the archaeological record. I assured him that although these were hardly art treasures, they would be of interest to archaeologists. I hope I did not exaggerate - only a couple are generally legible, as you will see. Still, I think there is some point to putting them on record, if only for the principal. In another matter, I am acting as an expert witness for the legal representatives of the Turkish government in efforts to secure the return of the Emali "Dekadrachm" hoard of coins, illegally excavated and smuggled out of Turkey. I imagine this little of relevance here, but you can appreciate my desire to remain above reproach in regard to antiquities!

Cordially,

David MacDonald

Last evening at EASCS
Jim DENGATE gave
me this address for
a Turkish archaeologist
(?) who is publishing
on Sumerian etc.

Some stamps from
Switzerland, but mostly also
of Swiss, or at least
w. little differences
as Jim Dugger told
me. I think these are
surface finds -

He said the finds from
the excavations there
of a few years ago
are in a hopelessly
abandoned heap in
the museum there. Too

can see pieces of vases
that should be glued together

Dungen was doing a survey of sites on the
E coast of the Black Sea. His wife did the
surveying. They had their son Ismael-Andrew
and their daughter (unpnt) Jessie.

Excavations at Sirogi

Excavations were carried on there in 1951-53,
see transl. of Brashinsky's 1961 article ("Addenda
of Crimean Archaeology"), p. 11 (p. 298 of the article),
and Sirogi amplifies page - even found.

N coast of Turkey,

Prof. Dr. J. MOREAU

HEIDELBERG, den 2.4.1961
Häusserstraße 26

Dear Miss Grace,

Through a letter from Dr Habicht, who is in Athens at the moment, I have learned that you have returned from America in January and that consequently my letter written to your assistant Miss Arvanitou could not have come to your knowledge before. I could not write before now owing to an illness.

I was surprised to hear that you still require additional information about number and origin of the Sinopean vase-handles, since in my letter to Miss Arvanitou I enclosed a complete survey of all Sinopean finds. In case this has been lost, I enclose a new copy and hope that it will be of some use to you.

Unfortunately I cannot enclose rubbings, since the stamps are in the keeping of the Archaeological Institute at the University of Ankara and have not been made accessible after my first and only visit there. I have only a set of rubbings and photographs which I badly need now to prepare my edition of the Inscriptions of Sinope, but I shall gladly put them at your disposal.

sal as soon as I have completed my draft. I enclose only a few photographs .

I should be very much obliged to you if you could give me your opinion on the identification of the stamps marked with asterisks.^κ It is not possible for me to attempt an identification myself since I am unable to obtain the pertinent publications in Germany and in Western Europe in general (specially the Russian catalogues).^κ

Thanking you very much in anticipation

I am, yours faithfully,

Jmorse

Prof. D. J. MOREAU

16. XII. 60

Dr. Habilitation of Gern. Inst.

HEIDELBERG, den 5.10.1960

Häusserstraße 26

called to reinforce this request.

Dear Miss Savatianos.

Thank you very much for your letter of October 1.
 I wish I could send you the rubbings of all handles we found in Sinope, but the handles are not here. They are at the Archaeological Institute at the University of Ankara, and I have only my own rubbings and drawings. I was in Ankara in September 1955 and could not draw or rub any handle then.
 I should like to have your kind advice on the handles I asked you about, not only the date, but also the origin.
 I enclose a list of all handles I could draw, rub or photograph. I hope this list will be useful to Miss Grace.

Yours sincerely

J. Moreau

P.S. Will you be kind enough to try an identification of the eleven "unidentified" handles I mention here (not only date, but also origin please), and to send me back this page of unidentified handles only?

imitation by Barbarians of greek letters?

cf. Canaraks 759

6) Quadrangular stamp 1,5 x 4,7 cm.

Dear Prof. Moreau,

I am writing to you on behalf of Miss Grace. She received your letter some time ago, and is very sorry not to have been able to answer it sooner.

We do not recognize from drawings your handles no. 2 and no. 4. It would be better if ~~you~~ we had rubbings. For the other handles we can date them as follow:

No. 1 in 2nd half of 2nd c. B.C.

No. 3 in mid. 3rd or 1st half of 3rd c. B.C.

No. 5 we think this is from Sinope. A possible reading is Θ AINI(Π IOYAZ
TYNO[MOYN
TOZEY[KAEYΣ
but we do not have a parallel. The names exist in Grakov's period V-VI.

No. 6 in 2nd half to $\frac{1}{4}$ 3rd quarter of the 2nd cent. B.C.

We would be grateful if you could send us rubbings of all your handles if convenient; or else tell us how many you have of each kind. Miss Grace would like to quote these figures in a coming survey article if you are willing. Your site is a very important one.

Yours sincerely

Prof. Dr. J. MOREAU

HEIDELBERG, den 24.8.1960
Häusserstraße 26

Dear Madam,

Permit me to approach you with a problem pertaining to my publication of inscriptions from Sinope. During the excavations 1952 & 1953 about 150 jar-handles were found and I am in charge of their publication. The great majority is of course Sinopean, but I have about 20 Rhodian, 3 Coan and a number of non-identified seals.

I should be very much obliged to you if you could have a look at the drawings and tell me your opinion about these mysterious seals. They are mysterious for me, but no doubt you know them.

Yours faithfully,
J. Moreau
