RHODES: 1984

I have just been looking through Lucy S.'s History of the School, 1939-80. I wonder if you have seen it and what you think of it. There are some odd errors, and in the list of School members quite a few should have been laid to rest who are listed as still living! She put a lot of work into it, at any rate.

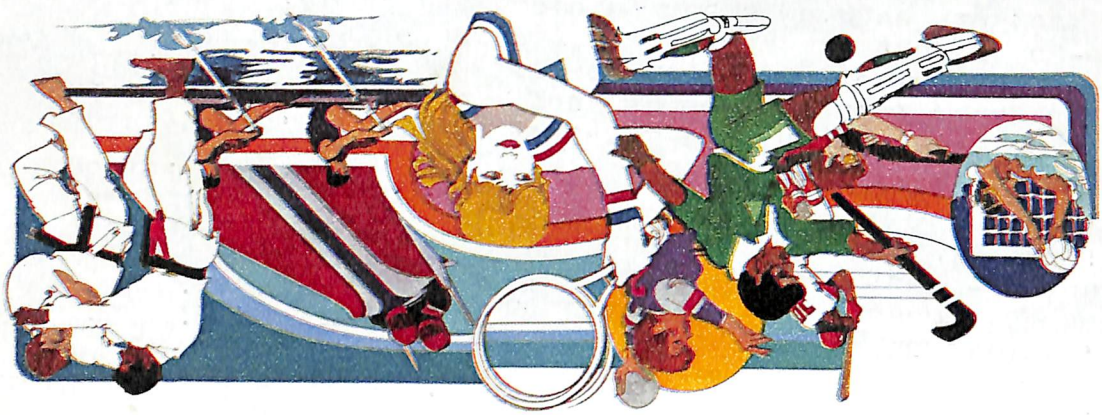

Carolyn must be well settled in the apartment by this time, if she is not traveling. Please give her my love.

And thanks again.
Love
Lady

Best to your Maria — + thanks

RHODES 1984

Columbia, Mo. June 30, 1984

1.02

Dear Virginia,

Your letter arrived yesterday - pretty good time. All very interesting. I am amazed at the reproductions of the rubbings- never imagined that these would reproduce so well.

Now the dates from the recent dig* must be compared with the notebook. I may have to write and ask them to xerox it for me, unless Niko Stambolidis can go there and study the matter. I am not surprised at the wide range in dates, since everything from first century AD down was dug, and I don't know without the notebook which is which.

As to the Makri handles, I am somewhat surprised at the late dates which most of the stamps have, as I thought I had chosen those from the very lowest levels. (Murray had said that he thought the pottery from the Makri lot to be later than that of the Kakoula, and now this judgment seems to be correct.) The glass beads from this lot were in part similar to those from Kakoula and partly not - and there was no gold glass or gold beads there. I dearly wish I could say a magic word or two and have that whole schoolyard uncovered in a moment. It will be forever tantalizing and unsolvable, I am afraid. I will have to be thinking that glassmaking went on in this general area for quite a long time - which somehow does not seem very probable. But perhaps that is true; I must try to convince myself first, and then the rest of the world!

In any case, I am most grateful for the information you have sent, and I admire your speed - would I could do likewise. On the way home I stopped in New York and went to Princeton for a couple of days. I saw the Thompsons - and am glad to report that Dorothy seems to have all her pep once more. I said to Homer, rather inanely, that the Agora glass publication would be better now that I know so much more than when I started it. He replied, rather drily, that this was fine as long as one did not postpone it too long. With these words of wisdom revolving in my head, I decided to tackle the Agora at once, and have been doing that since I returned home, leaving the Rhodian problem to simmer a bit... Unfortunately, I was home only three days when I became afflicted with premature hay fever. Apparently it had been raining steadily all spring, and things have bloomed inordinately, so that people who were never affected before are now suffering. Today is actually the first day that I feel normal. It is 70 degrees, sunny and fine, and I feel great. Until now I have really just been pushing papers around and pretending that I am doing something. That means more than 2 weeks partially lost. I hope this is the end for the present. I am going to try to see an allergist - there is none in this town so one must go to St. Louis (2 hours' drive).

In Princeton I stayed with the Wilbers and had a good visit with Frannie. Talked with Doreen Spitzer on the phone, but did not see her. Lyman received an honorary degree from Princeton at Commencement (the day I left). In New York I visited Margaret Thompson, who is rather discouraged at the state of her injured leg - not too good, and won't be.

RHODES 1981 - 1984

American School of Classical Studies
54 Swedias Street, Athens 106 76

June 26, 1984

14.VII.84 Never any reply to this

Dear Dr. Papachristodoulou,

Here is a copy of the readings of MΣ 865-905, from rubbings brought by Mrs. Weinberg, from stamps from the Stambolides excavations. Also enclosed are photocopies of the laid-out rubbings of these stamps, as a means of identification, since unfortunately the handles were not given individual numbers. (All from the same place received the same number, so that there are 11 handles all bearing the same number, "Makri 78". In the photocopy you see which is 78a, 78b, etc. But of course these a and b numbers are not written on the handles. Much better to give individual numbers to the handles.)

As Mrs. Weinberg needed the dates of these stamps, I have entered them beside the readings; some are more precise than others, according to the state of information. Here are the date equivalents for the date-periods here cited by Roman numerals:

I. before 240
II. ca. 240 - ca. 205 B.C.
III. ca. 305 - 175 B.C.
IV. 175 - 146 B.C.
V 146 - 108 B.C.

Carolyn Koehler arrived a few days ago, and is much concerned to get our amphoras cleaned up, there where they have gathered dust in the basement of the Stoa, so that you will be able to distinguish the color of the clay when you come to see them in September. She has to show them to some other groups also before that.

Yours sincerely,

Virginia R. Grace

14.10.85 Never an answer to this

Dear Dr. Papachristodoulou,

Thank you for your letter of April 18, also for the rubbings, which came a few days later, by kindness of Madame Angeliki Yannikouri. I think all the stamps have finally been read here except those on A 552 (MΣ 856). I enclose photocopies of our readings, as before, so now you are up to date with these; they run through MΣ 864, which is A 590. The MΣ numbering follows the A numbering, but in what we were given of the A series there are of course gaps. (Perhaps they are unstamped amphoras?) The enclosed records are not as full as those sent to you on previous occasions, since 1) there are no photograph numbers so far to be entered, and 2) we have no record as to the finding places (which jars were found together, etc.), and 3) I don't know just what the preservation is of each piece, whether or not you have most or all of the amphora. This last information would probably have been noted by Mrs. Matheson, but I think on their day in the apotheke she had a very bad cold and had to stay in the hotel. All this information is of course easily available to you there. We have provided readings, some with restorations which could probably not have been made without the help of our archives here.

The group of amphoras is an interesting one, and the material in general, I venture to say, deserves as good a scholar as you can find to present it, somebody who is careful as well as bright and interested, somebody with enough time. When you find the right person, we here would be glad to act as consultants. Well worth publication in this group, in addition to many of the Rhodian, are a Thasian (A 540, MΣ 852), and especially a Chian (A566, MΣ 858). This latter is the first whole jar (is it whole?) with the stamp most common on Chian stamped handles, ΙΚΕΣΙΟΥ. We now see one reason why the stamp is so common, since on A 566 both handles are stamped with this name. Any statistics on stamped Chian

12.02

should now take account of the fact that two stamped handles may amount to only one jar.

Would you not like perhaps yourself to present the Chian A 566 at the colloquium in September? Perhaps along with your plan to start a centre of amphora studies in Rhodes. In a way, you might prefer to use a Rhodian amphora to illustrate this plan, and there are plenty to choose from. But A 566 has the advantage of being important as as individual piece, not involving one in name-connections, etc., that might take too much time for now. Reference for the stamp: Hesperia Suppl. X, p. 166, no. 198. For the Chian class in general, EAD 27, pp. 359-363, and for Chian(?) stamps, especially pp. 360-361. I would expect the shape of your jar to be rather close to that of Agora P 1114, to be seen to the left in fig. 47 of my Picture Book, Amphoras and the Ancient Wine Trade. This jar came from Thompson's Group B, whose end date we now put at ca. 240 B.C., cf. Ath.Mitt. 1974, p.198, note 19 (you have my off-print). It will in fact be interesting to see how close in shape is A 566 to Agora P 1114. Was your amphora found with any of the Rhodian? That might help with its date. If you are interested, I can give you other more recent references, also the names of some people working on Chian jars, Chian names, etc. They have no whole jars stamped with the stamp of Hikesios. We have recorded 194 handles impressed with this stamp.

To publish the Chian, as well as the rest of your interesting series of jars, basic are properly taken photographs. Especially in the 3rd century B.C., the shape of the Rhodian jar gives the third indication of date, after the contents of the two stamps, and one must adjust chronology to all the evidence. One must learn how amphoras should be taken - I could show you some very bad results produced by professional phbtographers who did not know or would not bother. I regret I cannot come now, to do my best. Would you be willing for me to try to persuade Carolyn Koehler to photograph your new amphoras, on her way to Budrum this summer? She has learned how they should be done, for her book now in press, on

12.03

Corinthian. We would of course want prints. Any eventual publication would be by individual permission, as has been my custom anyhow.

If for any reason you find it inconvenient for us to photograph this material, you must of course just say so, and I accept. As things are, I have what I most need, in that the material recorded in previous years remains available, thanks to your help.

I should however like to have your advice on the letter from the Ministry of which (for identification) I enclose a photocopy, a letter dated May 2, 1984, addressed to the American School, and signed by Mr. Tsedakis (whom I have not met, I think, but may meet later this month). This letter, as you see, has reference to my work in Rhodes. I do not understand the occasion for it. I should have thought yours to me of April 18 covered the necessary ground, also that everything had been settled by the local symvoulion. I find here a kind of hostility which I have not had before from the Service. Is there some misunderstanding to be treated? I would be glad of your help. Incidentally the list of items whose stamps may be studied by us is not quite accurate in Mr. Tsedakis' letter. Probably this does not matter?

Mrs. Weinberg was here briefly between Rhodes and Missouri. She was happy about the excavation of Mr. Stamboulides, even though a glass factory has not been actually found. Happy also that there was general appreciation of what she was doing. She has left me some rubbings of the stamped handles they found, for readings and dates, to help with dating the excavation. Would you like to have copies also of those readings?

Yours sincerely,

Virginia R. Grace

Αγαπητή κ.GRACE

Ευχαριστούμε για την επιστολή σας της 26-3-1984.

Το θέμα της μελέτης των συνδυασμών των αφραγίδων στους νέους αμφορείς που ζητήσατε, πέρασε για τυπικούς λόγους από το Τοπικό Αρχαιολογικό Συμβούλιο, που έδωσε τη συγκατάθεσή του. Έτσι ετοιμάσαμε και σας στείλαμε ήδη τα εκτυπώματα (rubbings) και ελπίζω να τα έχετε σύνταμα.

Δεν υπάρχει θέμα να μη συνεχίσετε να έχετε πρόσβαση στο υλικό που χρησιμοποιούσατε όλα τα προηγούμενα χρόνια και εσείς έχετε απόλυτη προτεραιότητα μελέτης από όλους τους ξένους επιστήμονες. Το θέμα αυτό έχει διευκρινισθεί και με την τελευταία επιστολή του Γεν. Εφόρου κ. Κωνσταντινόπουλου προς τον κ. EMPEREUR.

Σε ό,τι αφορά τα νέα ευρήματα που θα παρουσιάζονται απ'εδώ και πέρα, για λόγους ίσης μεταχείρισης η Εφορεία δεν μπορεί να παραχωρήσει αποκλειστικά δικαιώματα πρόσβασης στους συνεργάτες σας. Τα ευρήματα θα πρέπει να είναι προσιτά σε όλους τους ερευνητές, αφού η πρώτη δημοσίευσή τους γίνει από τους επιστήμονες της Εφορείας μας, η οποία είναι καιρός να ασχοληθεί συστηματικώτερα με τους αμφορείς της περιοχής της. Το Μουσείο Ρόδου θα πρέπει να γίνει ένα από τα κέντρα μελέτης, σε ό,τι τουλάχιστο αφορά τους ροδιακούς αμφορείς. Φυσικά θα συνεργάζεται με όλους τους επιστήμονες που ασχολούνται με τα σχετικά θέματα. Σε σας θα παρέχουμε κάθε δυνατή διευκόλυνση έως ότου συμπληρώσετε και παρουσιάσετε το σπουδαίο έργο του καταλόγου των ροδίων επωνύμων και εργοστασιαρχών.-

Dr. Ioannis Papachristodoulou
Ministry of Culture and Science
Ephorate of Prehistoric and Classical Antiquities
of the Dodekanese
Rhodes, Dodekanese

Dear Dr. Papachristodoulou:

Thank you very much for facilitating recent controls and preliminary investigations for me by Mr. and Mrs. Dugald Matheson, assisted by Dr. David Jordan, during their visit to Rhodes of 13-15.III.84.

Following lists made by them of new amphoras (or large fragments) shown to them in your storage places, I would like to apply for permission to make records (rubbings, measurements and other notes, photographs and where needed drawings) of the following items:

MΣ 839 A 507 ✓	MΣ 848 A 523 ✓	MΣ 862 A 554 ✓ 584 ✓
MΣ 840 A 510 ✓	MΣ 849 A 525 ✓	MΣ 857 A 558 ✓
MΣ 841 A 511 ✓	MΣ 850 A 530 ✓	— — (A 564) δεν διαθέσιμη
MΣ 842 A 514 ✓	MΣ 851 A 533 ✓	MΣ 858 A 566 ✓
MΣ 843 A 516 ← no print	MΣ 852 A 540 ✓	MΣ 859 A 570 ✓
MΣ 844 A 517 ✓	MΣ 853 A 548 ✓	MΣ 860 A 572 ✓
MΣ 845 A 520 ✓	MΣ 854 A 550 ← no print	MΣ 861 A 573 ✓
MΣ 846 A 521 ✓	MΣ 855 A 551 ✓	MΣ 863 A 586 ✓
MΣ 847 A 522 ← no print	MΣ 856 A 552 ✓	MΣ 864 A 590 ✓

MΣ numbers entered by AA

It is fairly likely that I would not be able to make these records personally in the near future, and with your permission I would like to appoint one or more of the following to do the work for me:

Professor Carolyn G. Koehler
Professor Malcolm B. Wallace
Mrs. Philippa M. W. Matheson

The date of Mrs. Matheson's return to Greece is not yet settled, but Professor Koehler and Professor Wallace are expected early in the summer of 1984.

Yours sincerely,

Virginia R. Grace

March 26, 1984

Dear Dr. Papachristodoulou,

I enclose what I hope is the application you wanted for permission to record and study the new material listed for me on March 14-15 by the Mathesons and Dr. Jordan, under the kind supervision of Madame Angeliki. Note that A 504 is not included; apparently it had been listed by mistake, as it is actually MΣ 504, which I photographed in 1970. (You have the readings in the copy we sent you of the MΣ series.)

Please come and see me when you are in Athens, perhaps in April? You might then bring me our rubbings? When we have them, we can make readings, and send you your copies as before. I would be glad if you would explain to me some of the possible new rules you mentioned to the Mathesons, which I have not fully understood.

Please let me know if there is something omitted from my application which should be there, for the new material. You will, I am sure, let me know if there are formalities needed so that I may continue to make use of the older material recorded by your permission and by those of your predecessors. I have supposed one should ask for permission to publish when one was ready to do it. I would not like again to be confronted by the possibility of being excluded from using information which over the years has passed very widely into my archives. And I do not think there would be an advantage to science in turning over the material, at this point, to some one else instead of to me. Don't you agree?

To return for a moment to the list in the enclosed application: I note that it does not include any of the A items of which Miss Panella asked you for photographs. Of all she requested, I have photographed only MΣ 493 and 524 and 598 (which is A 409). Do you want me to send ~~xxxx~~ you prints to send her?

My greetings as always to your father. Yours sincerely,

Copy & PMWM

18. iii. 84

Back in Athens

Conversations with the Ἐφορεία at Rhodes. on 14 and 15. III. 84

We had ~~two more~~ a number of conversations with Mr. Papachristodoulou and Ἀγγελίκη Πετράκη - Κ: , first when we all arrived on the morning of the 14th to work, again when we stopped work at 2.30 that day, and various brief encounters on the 15th. Various points emerged:

1) Empereur's visit to Rhodes (Dec 1983) and ~~Kitto~~ P's and A's subsequent conversations with VG in Athens have made them feel that ~~some~~ more control on who gets what information must be exercised in the future. Papax was particularly impressed that E. had gone through all the Alexandria material - he wanted to know what DS? ἄδεια he had had for that and for picking up pieces on Rhodes itself. I said I understood that he was to give a paper on his findings about Rhodian clay at the Congress, from the βόλτες he had made around Rhodes. P. and A.: "He certainly made βόλτες...". P said it was bad that he did things "πίσω ἀπ' τὴν πλάτη μας". They said he had made an ἀίτημα to study masses of Rhodian things (Petrakis: "Ἐκ τὸ κάνετε". P+A: "Μήπως ὄχι"). I think they DS? said he was a κλέφτης ἀπὸ πέτρα. I tried to say that the trouble was not so much that he learned things, but that he made publications with inaccuracies and insufficient information and that it was very important for VG to publish the lists of eponyms and fabricants correctly from her 50 years' study of the subject so that misinformation would not circulated and have to be corrected. P. said VG's methods were scholarly and accurate and when the question of the new material came up [see "Formalities"], I asked specifically if we could study only the new pairs of names to ensure the accuracy of VG's forthcoming magnum opus. I thought

23.07

that he debated as to whether it would be possible to allow that <u>without</u> applying all the regulations strictly as a part of an on-going project — on the first day he said he would give us a decision later.

2) We discussed the Amphora Information Center (he said he owed me a letter). I said the idea was that accurate information should be available to all, and that only from VG's files could accurate information be properly obtained [P said "Emperemr says he wants to make accurate information available to all, too"]. He said they had decided to follow the rules now and he did not want to make any decisions for the immediate future. A told me that there were people "ἀπὸ ἔξω" who wanted to work on this material and I said that was good and I hoped that I could help by showing them how to make rubbings — easier to read than the objects themselves and good to glue onto file cards. ~~She~~ She said I could show her — I have the impression that she will hope to publish Rhodian amphoras herself. I mentioned to P that he had said something about having a center for the study of amphoras on Rhodes and he said in the future he would like to set up a study center for Rhodian amphoras but that was not being decided now. I said that the studies that VG had made would be very important for his center and that up to now it had been a very good συνεργασία. P: "Θα ἔχουμε ἀκόμα συνεργασία but the basis will change." I said they should have computers as well as graphite and χαρτάκια and A said could I give them that too...?

DJ?

Conversations at Rhodes (cont'd)

3) P asked after Mac and I said he was coming in July but I did not know if he would have time to come to Rhodes and ~~feel~~ I hoped P got an offprint from us. He said he hoped he had acknowledged it, we all agreed that it was hard to read (DJ's original remark) but P said it was σπουδαίο and I said it showed χρονολογία and the μετρήματα might be useful. P. remarked that Mac had always asked his permission to study things first. I ~~X~~ I don't think we gave all the proper acknowledgements in the article - a general one only I. About Kos (and possibly seeing some handles there) P asked me what work I was doing and I described the Koan corpus in some detail (that I was helping VG ~~Gra~~ and MZΠ with a complete study of all the types of stamps found on Koan from everywhere in the Mediterranean, that the book had been being written ~~since~~ since 1961, that I came every year to work on it). He thought that was σπουδαίο, too - I had the impression that he was assessing the credentials of all future and present amphorists and that those engaged in long-term studies were to be preferred over the Επερεurs who "~~Hacke~~ "grab at things from here and there".

4) When we left, we ~~Kokk~~ did not see Papay but told Άγγελική that we had taken a list of the numbers of the jars which we had rubbed and turned over all our rubbings to her, in 2 separate envelopes, one set marked "για την Ρόδο", the other "για την Αθήνα" - ~~there~~ there should be 2 envelopes for Athens, 1 of the rubbings taken on 14.iii.84 and the other (all taken by DFM) of work done on 15.iii.84. She said that we must make an αίτηση asking to study, photograph and make σχέδια (and έκτυπα?) of 4 specified Anumbers, and that the letter should come this week since the συμβούλιο would happen soon the following week (? beginning April?). She asked who would sign it.

I said as they knew it was hard for VG to come and that perhaps we would sign it together, asking permission for us to do work for VG. Permission will be sent by the συμβούλιο to A and to us, and will take at least a month. If permission is granted they will send the Athens set of rubbings to VG.

~~A had to~~

I said that among the new jars we had listed (and rubbed) were a Thasian and a Chian – i.e. they were not all Rhodian pairs, as I had requested from Papax. She said that did not matter as we were were to make an αίτημα and we could ask to study anything we wanted.

She had telephoned the museum as Kos on our behalf (a Κυρία ? – didn't get name) and been told that the amphora pieces had not been arranged (ταξινόμησις not done) and that it would be impossible to find anything. What should we do? Go to the Asklepeion, visit the old πλάτανο, rent bicycles and make trips on the island – it is her island and more beautiful that Rhodes (objections from 4 or 5 παιδιά in the ἐφορεῖο). She gave us the name of a hotel (Μαραθίνα) where we in fact stayed (Γ', 1500 δρχ for a double room with breakfast)

Formalities now obtaining

1) We are not permitted to study any object found after our last visit in 1980, i.e. anything with an A number above A 500, without making αἴτησις and having our request referred to an archeological συμβούλιο. [JYE has made such an αἴτησις – I said "Θά τὸ κάνει", they said "Don't be too sure"]

2) Permission to take photographs, even of "old" things, is granted only on condition that we leave a print and a copy of the negative with the ἐφορεία [D Jordan – "but there is only one negative" ΠΑΠΑΧ "Take 2 photos of the same object and give us one of the negatives"] No conditions were attached to handling old objects, taking heights, diameters etc and looking through the ΠΑΠΑΡΙΑ.

3) The new finds seem to be housed mostly at the Καστέλλο, not fenced off from the old. Ἀγγελική came to see us there while we were finding and measuring old finds and showed us ~~who~~ which racks contained new things. I showed her how to take rubbings and promised to send her χαρτάκια and graphite. We were allowed only to look at the new finds and make a note of the jars which we wished to study, but she agreed to letting me take 2 sets of rubbings of anything of particular interest [see conversation with ΠΑΠΑΧ], one for their own records so that they could glue them in to their κατάλογο and the other to be sent to us if and when they decided we could have permission to study. [I think they are unsure whether an αἴτησις will be necessary, i.e whether to ask us to make one or whether to make one themselves, or whether simply to give permission it...]

AΔ - I decided to wait for the rubbings, hoping they will come as soon as I get to a'lytic time.
If we go ahead & file now, may find mistakes, further rubbings

Rhodes: paris recorded
but rubbings not yet delivered

AΔ please look through my proposed COMBS; look up in file the individual readings.

28 jars.

Trip to Rhodes of McTheson + David J.

My preparations for this trip were put off and curried by 1) struggling with Sally Rhoads' efforts to write up the emphysema from the Gutturalia Well, and 2) by Prof. Sanitarius who came Monday 12. III and stayed most of the day taking notes on names on Claim (?) jars, and on what examples have been found. (Why did I let him in on this? I don't know, except he has been working for years on a Claim prosopography, and he has to give the 120th lecture of the upcoming Claim congress.)

On Tuesday 13. III I telephoned Papa X's office and got "Agadicky" who seemed competent and pleasant. Maggie, etc. to be allowed to work on the 14th, and yesterday to catch up on what on A numbers. Such lists as I had managed to assemble, I gave to M., and they are to be brought back. The group left to Agora about 5:00, for a 6:30 plane.

Please bring back.

13.III.94
Tues. 30.01

Mallinson's trip to Rhodes
(and Kos)

called about 11:00 pm.

Call again Mr. Papax: 0241 27674
I got Angeliki (P. was executive)

1. Mr. + Mrs. M. due on the island this coming.
Yes

2. With them, David Jordan.
Good

3. The M.s to come to the Museum-Apollonia
— tomorrow a.m. as planned,
with P's permission.
Fine

4. Wd Mr. P. like to see Mr. Jordan?
(I think so)

5. The M.s will take certain measurements,
perhaps a few photos of amphoras, &
also rubbings of some stamps — Kevo
in our records
Eps

OK

25 250

6. ~~If~~ permitted, the Mss would find out what are those A items in Panella's letter that can't be known. (X) And record any ~~A~~ A items numbered since our records and send readings and other information to M. Papa X.

God

David Jordan could expedite their work

God

7. Will these people be able to see amphoras or stamped handles in Kos? i.e. in the Museum.

Consult with Angeliki

In fact, she told them to walk about the island (the Hagpita).

(X) 26, III, 85 Not one of Panella's missing desiderata was included among the A items they were given to list (and rub).

Today about 1:15 p.m. I telephoned Mr. Papadimitriadou, and asked if Polyxeni (and the husband) could come to work in the apotheke for one day, and if Wed. March 14 would be OK. He said yes. He himself had a rendezvous to be in Archangel, but "Aggeliki" could take care of things. I said they would need Manoli, and he said of course.

I said: measurements, rubbings, maybe some photos.

I must get up a list for forgotten data.

In the meantime, Maggie says that when last she went to Rhodes, with Dugald and David Jordan to measure for Mac, (in Nov. 1981) they were turning up new Rhodian amphoras left & right. Some of those Armenous Pamela asked for, probably are real new ones Rhodians we don't know. See if Maggie can get to record them for me.

As Dr. Thurston will be available when she is there, best to get permission for the photographs.

SCUDDER

SCUDDER, STEVENS & CLARK INVESTMENT COUNSEL

SCUDDER INCOME FUND, INC.

FOURTH QUARTER DIVIDEND

We are pleased to enclose a confirmation or check representing the distribution of a dividend from net investment income of $.30 per share payable December 1, 1978 to holders of record November 15, 1978. This is the Fund's 204th consecutive income dividend and brings the total 1978 income dividend to $1.05 per share.

This distribution was either reinvested or paid in cash according to your standing instructions.

Internal Revenue Service Form 1099DIV showing total distributions paid to you during 1978 and that portion of the year's net income which qualifies for the dividends received exclusion provisions of the Internal Revenue Code will be furnished by January 31, 1979.

Sincerely,
David S. Lee
Treasurer

December 1, 1978

Processing of Rhodes results and accumulating COMB.S

Rolls 747 and 748 have been developed → prints (748 badly developed). The prints belonging on the COMB. cards have been applied. When the cards are sponge cards, these have been filed in the general COMB.s file. & The fab. cards are kept out, whether or not plants as yet applied, and kept in MS (inv.) order with a rubber band, the pack kept in the box of files for the FOLLOW-UP article.

& [But see below, p. 2]

When the rest of these films have been processed and prints applied to the cards:

1.) Put all recently (last few years) made COMB cards supplied by fabricants (they are in any case the fab. cards, as the others will have been filed back in the general file)

2.) Using this file of recent fabs., enter on proof-cards of fabs. and then b) in lists showing name-connections with fabs

(Esp. on proof-cards, some of this entering will already have been done, but must check.)

a.) confident

3.) Rearrange the same cards by sponges (though they are not the real sp. cards)

30.VII.79 36.02

4.) As in (2) for the jobs, make entries on ep. passp. cards, and in ep. list of your own. Be sure eps. are marked with their blue dates (Str.)

5.) Arrange these fab. cards, but by the dates of their eps., in the file preparing for the photos of the follow-up article.

⊗ for p.1 11.XI.79

When only the ep.-stamp is preserved, its card remains in the ME sequence, preceding part of jar or large fr.-frus., etc.; e.g. ME 496, 497, etc.

Points have now been made and processed of Rolls 747 – 751. Remain only a few exposures at start of 752.
